

		SEI PROJECT 2 Node/Express/MongoDB Full-Stack CRUD Application CODE REVIEW		
	Student Name	Aisha Mamoor		
	<i>All criteria are minimum requirements and all must be met in order to pass.</i>			
	Planning Requirements		Instructor:	Usman Bashir
			<i>Complete?</i>	<i>Comments (optional)</i>
		A "public" Trello Board used for the project's planning.	Yes	
		"Ice Box", "Current/MVP", & "Completed" Trello lists for holding User Story cards.	Yes	
		User stories follow the "As a <user role>, I want <feature>, because <reason>." format. (<reason> is optional if it's blatantly obvious)	Yes	
		Trello contains a "Wireframes" list with wireframes for the app's main functionality.	Yes	
		Trello contains an "ERD" list with an Entity-Relationship-Diagram for the app's data model.	Yes	
	Presentation Requirements			
			<i>Complete?</i>	<i>Comments (optional)</i>
		Project introduced by paraphrasing the README.	Yes	
		Deployed app launched by clicking the link in the README.	Yes	
		App's features demonstrated using the "preferred user.	Yes	
		Demonstrated full CRUD.	Yes	
		Showed the code for the "main" Mongoose Model, its controller, & favorite EJS template.	Yes	
		Share your key learnings/takeaways.	Yes	
	Readme Requirements			
			<i>Complete?</i>	<i>Comments (optional)</i>
		App Title: Contains a description of what the app does and optional background info.	Yes	
		Screenshot(s): App's landing page and any other screenshots of interest.	Yes	
		Technologies Used: List of the technologies used, e.g., JavaScript, HTML, CSS, ...	Yes	
		Getting Started: Includes a link to the deployed app and the Trello planning.	Yes	

	Next Steps: Planned future enhancements (icebox items).	Yes	
Technical Requirements			
		<i>Complete?</i>	<i>Comments (optional)</i>
	App has at least two data entities (embedded or referenced) in addition to the User model.	Yes	
	OAuth is implemented.	Yes	
	Basic authorization is implemented that restricts access to certain features by "protecting" those routes (using middleware) from anonymous users and allowing editing and deletion by only the user that created the data.	Yes	
	App has full CRUD implemented somewhere within its features.	Yes	
	App looks and feels similar to apps we use on a daily basis - it has a consistent and polished user interface.	Yes	
Necessary Deliverables			
		<i>Complete?</i>	<i>Comments (optional)</i>
	The full-stack app is deployed.	Yes	
	Frequent commits dating back to the very beginning of the project. Commit messages should be in the present tense.	Yes	
Summary			
Does project meet minimum requirements and is passing?		Yes	
Overall Comments	I really appreciate the great idea behind your app! Just a couple of suggestions: tweaking the font on mobile could enhance readability and user experience. Also, the home page could use a bit more content before a user logs in. Apart from that, everything works smoothly as expected. Keep up the good work!
